Phi Partners

Reach Peak Performance with Summit PaaS

Unlock the full value of your trading technology with Phi Partners' cloud-enabled, comprehensive Summit service.

Getting the most from Summit

With tightening budgets, scarcity of talent, ever-changing regulations and challenges posed by legacy infrastructure models, getting the most from your Summit trading platform is no easy task.

An outdated approach to Summit management presents further frustrations, including barriers to innovation and pressure to keep pace with relentless upgrade cycles.

At the heart of the problem is how slow treasury capital markets have been to reassess traditional models for ownership and management of technology. A Summit Service Revolution is overdue.

It's time to change the Summit status quo

In much the same way that Netflix has transformed media consumption for viewers, a smarter approach to Summit can deliver convenience, flexibility and cost-efficiencies for financial markets institutions.

Besides upfront CapEx investments and obsolescence for infrastructure, the Summit status quo bears several key problems for your business:

Multiparty management
across Summit support, Summit operations, infrastructure management and infrastructure hosting is complex, disjointed and inefficient.
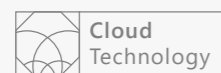

Legacy architectures
are fragile, expensive to maintain and offer suboptimal performance.

In-house teams
can be costly, slow to scale and present constant challenges around recruitment, retention and training in new features.

Change delivery is throttled
by the cost and effort of keeping the live system running.

Cloud Technology

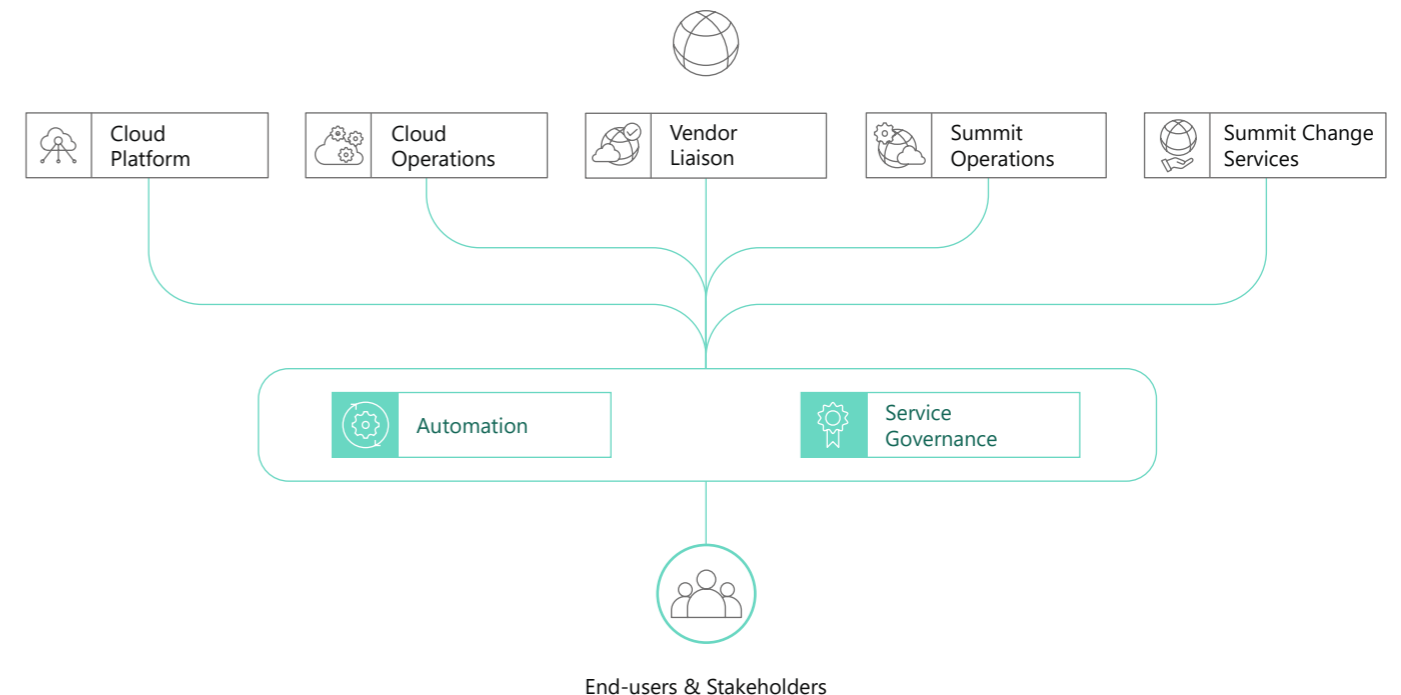

Introducing Summit PaaS

Summit PaaS (Platform-as-a-Service) from Phi is revolutionising Summit management. Through the transformative power of the cloud, automation from app to infra and robust service governance, we're delivering agility, efficiency and optimal Summit performance.

Adopt a smarter, simpler approach to Summit and unlock the true potential of your trading technology with Summit PaaS.

The Summit status quo

| Infrastructure | Infrastructure Management | Vendor Liaison | Summit Operations | Summit Change Services |

End-users & Stakeholders

Summit PaaS:
A Summit Service Revolution

| Cloud Platform | Cloud Operations | Vendor Liaison | Summit Operations | Summit Change Services |

Automation | Service Governance

End-users & Stakeholders

Embrace the benefits of cloud-enabled Summit

"Moving Summit onto the cloud with Summit PaaS doesn't just save time, effort and money – it readies your business for constant, proactive innovation."
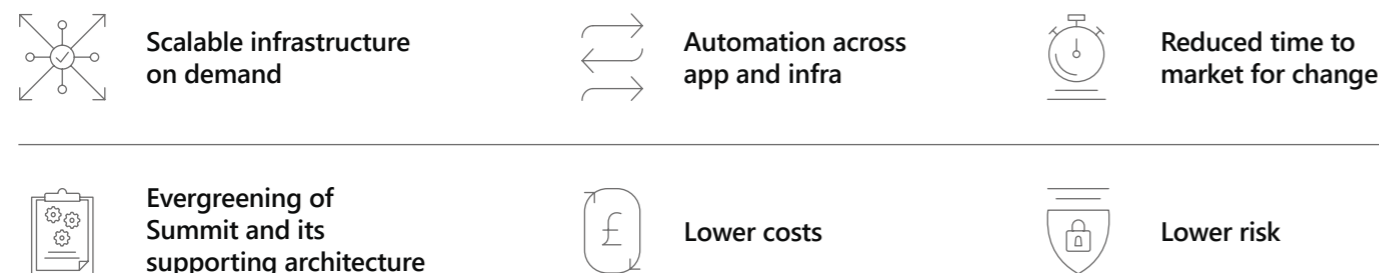

Nikos Terizakis, Head of Public Cloud Services

Discover the ultimate Summit managed service

We employ the largest pool of Summit experts in the world so that we can take responsibility for the operation of your entire Summit solution– from top to bottom, app to infra, across support and change.

Phi Partners is home to the world's leading cloud and Summit experts. Nowhere else will you find the same blend of specialised talent capable of delivering mutualised services that align across application and infrastructure. From the development of business cases and cloud adoption strategies through to migration, monitoring and testing, Summit PaaS follows proven transition methodologies so that your business can effortlessly embrace the benefits of the cloud.

Partner with Phi to move your Summit technology into the cloud and unlock:

Scalable infrastructure on demand	Automation across app and infra	Reduced time to market for change
Evergreening of Summit and its supporting architecture	Lower costs	Lower risk

"Compared to multi-party models, Phi's in-house approach brings efficiency, accountability and lower complexity."

Helen Saunders, Chief Solutions Officer

Summit PaaS is revolutionising Summit service delivery by providing:

World-leading Summit expertise:
Our experts have unmatched knowledge of the platform honed by experience in the most complex and highly customised Summit environments.

Flexible, cost-efficient talent-resource:
Say goodbye to capacity limitations and recruitment and retention headaches. Our experts are on hand whenever you need them. And you only pay for their services when they are required.

24/7 service and support:
Our experts are available round the clock to resolve any Summit issues quickly and proficiently, with services guaranteed against SLAs .

Improved Summit outcomes:
Our proven, best practice service delivery approach combined with expert user support delivers better and more reliable Summit user experience.

Test automation
is included as standard within the service, enabling evergreening and improving quality while reducing effort from your staff.

Scope for innovation:
Summit PaaS allows your people to focus on your business's core competencies so they can innovate and add maximum value.
